Innovations for Information Analysis And Comprehension  
A Consortium at the Ohio State University

**RSVP**

Dr. David Woods [woods.2@osu.edu](mailto:woods.2@osu.edu)  
Dr. Emily Patterson [patterson.150@osu.edu](mailto:patterson.150@osu.edu)  
Lunch will be provided

## Institute for Collaborative Innovation Final Show

The new initiative at Ohio State University—Converging Perspectives on Data (CPoD)—pursues innovative solutions to data overload problems in information analysis and comprehension tasks.

This summer, interdisciplinary teams of faculty and graduate students participated in the Institute for Collaborative Innovation (ICI), a unique immersion experience. At our Final Show, we will walk attendees through how we have advanced the state-of-the-art by exploring leverage points to address challenges in intelligence analysis exacerbated by data overload conditions. The specific theme for this summer is improving and rendering observable the rigor of a process behind an analytic conclusion.

25 August  
Main Lobby  
Knowlton Hall  
275 W. Woodruff Ave  
(Architecture Building)

### About CPoD

The CPoD is an interdisciplinary consortium of world-class researchers in Information Analysis and Comprehension. The consortium pools expertise in cognitive systems engineering, political science, design, cognitive science, field research, perception, and computer science to solve problems at the intersections of people, technology and work.

The CPoD is affiliated with the Institute for Ergonomics and the Cognitive Systems Engineering Laboratory.
